9. Deskripsi karya :

Now and Then bicara tentang hidup dan kehidupan semua entitas di muka bumi. Bermula dari benih, tanah, panas, udara, dan air. Bumi memberi ruang semua unsur untuk saling menjamah dalam aliran energi. Air merupakan entitas yang posisinya sangat mulia, karena keberadaannya melahirkan kehidupan - kehidupan yang saling terhubung dalam ikatan - ikatan yang terjalin penuh pola. Diperlakukan dengan baik atau tidak ia tetap berusaha mengalir meski dalam ketidakpastian. Siklusnya tak pernah berubah dari masa ke masa. Saat ini dan nanti air akan selalu memberi energi bagi semua makhluk hidup untuk bercinta dan melahirkan jiwa ke dunia. Perjalanan Setiawan Sabana bagi saya adalah seperti sebuah kisah seperti air yang terus mengalir dan membagikan zat - zat ke seluruh rongga yang dialiri. Menjadikan tumbuh benih - benih ilmu pengetahuan saling menyebar dan berbagi ke seluruh penjuru.

*Now and Then talk about life and the lives of all entities on earth. Starting from seed, soil, heat, air, and water. Earth gives space for all elements to touch each other in the flow of energy. Water is an entity whose position is very noble, because its existence gives birth to life which is connected to each other in bonds that are entwined with full of patterns. Treated well or not, it still tries to flow even in uncertainty. The cycle never changes from time to time. Now and the , water will always provide energy for all living things to make love and give birth to souls into the world. Setiawan Sabana's journey for me is like a story of water that keeps flowing and distributes substances to all the cavities it flows through. Making the seeds of knowledge grow and spread to all corners.*
