Bisikan Semesta
Acrylic on Canvas
80 x 70 cm
2024

Bisikan Semesta merefleksikan suara halus dan misterius dari alam semesta yang hanya dapat ditangkap melalui kepekaan rasa dan batin. Karya ini mengajak hadirin berdialog dengan semesta, mencoba merasakan isyarat-isyarat yang sulit diterjemahkan namun dapat dimaknai secara intuitif. Dalam keheningan bisikan itu, terpendam harapan agar manusia kembali selaras dengan alam dan menghentikan eksploitasi terhadap jagat raya.

Regardless of the definitions and theories of its existence, the ocean, the sea, the pasir (Bali), for me is a mysterious existence that exists on earth. Until now, we have not been able to uncover how it came to be. Looking closely into the depths of our hearts, it raises many questions, and gives rise to various imaginations and interpretations. To the naked eye, it is true, it is a liquid substance, a liquid that spills out, expanding to fill the universe, with no known end, "straight without end" accompanied by the rhythm of the waves, further strengthening the mystical impression it creates. "Hamparan Biru" is a visualization of the ocean, sea, and pasir captured with an aesthetic sense that provides a sense of peace in order to balance the dynamics of life and living.
